# Asif Al Fattha Fahim

MERN Stack Developer | Aspiring Software Engineer | Exploring modern web apps & scalable systems | Social Media Ads Expert helping brands grow | Passionate about learning, building & innovating

Dhaka, Bangladesh

## Summary

I'm a MERN Stack Developer passionate about building modern and user-friendly web applications. My long-term goal is to become a skilled Software Engineer, and I'm continuously improving my skills in both frontend and backend development.

On the frontend, I work with HTML, CSS, Tailwind CSS, JavaScript, and React.js to create clean, responsive, and interactive user interfaces. On the backend, I use Node.js, Express.js, and MongoDB to build fast and scalable applications.

I also have knowledge of multiple programming languages such as C, C++, Python, and Java, which strengthen my problem-solving and core programming foundation. Currently, I'm focusing on developing my skills in Next.js to build high-performance, SEO-friendly full-stack apps.

I love learning new technologies, challenging myself, and building meaningful digital solutions that make an impact. My goal is to grow as a developer and become a professional Software Engineer.
